

seaexplorer

Your ultimate service for streamlining sea logistics

seaexplorer is a digital tool that consolidates information about the global container shipping network, and sea news, on one unified hub. It provides essential information and real-time data to optimise your shipping routes and highlights potential disruptions to improve your supply chain efficiency.

Optimise your sea logistics

On seaexplorer you will find real-time information about:

150,000

port-to-port
connections
for FCL

1,575

carrier services

17,400

weekly departures
of about 5,000
container vessels

750

ports

Key features of seaexplorer

Visibility: Global real-time information on disruptions, port-to-port routings, sailing schedules, carrier performance and vessel locations.

Comparative data: Compare services based on speed, reliability, and CO2 emissions.

Predictions: Receive accurate predictions of vessel arrivals and realistic transit times based on historical data.

Risk mitigation: Identify potential disruptions early and take proactive measures to avoid them.

SeaNews: Stay informed with the latest sea logistics news and operational information.

Analytics: Gain insights into shipping activities worldwide.

Customisation: Use tags and options to follow routings and receive alerts about changes.

Everything you need to know

seaexplorer is seamlessly integrated into Kuehne+Nagel's online customer platform, myKN, to register:

1. Visit the registration page for myKN or go to www.seaexplorer.com.
2. Fill out the registration form.
3. Then log-in to myKN or seaexplorer.
